

ALBANY II

2-Way Bookshelf Speaker

Having a choice of proven technologies gives KLH a clear advantage. The Albany II is anything but a “bookshelf version” of our tower speakers. Albany II, by the street of the same name, brings improbable sound from an affordable loudspeaker. It is a 2-way bass-reflex design, featuring woven Kevlar drivers with steel baskets, braided tinsel leads, custom designed crossovers, an anodized aluminum tweeter with linear response faceplate, and much more. The Albany II is finished in European Walnut and Black Oak.
