KENDALLS

KLH Kendall floor standing speakers stand face-to-face with the best sounding floor standing speakers on the market. Their distortion-free sound, pinpoint accuracy, and transparent bass response undoubtedly makes them the ultimate choice in the eyes of any audiophile. The Kendall's effortless execution of an artist's soundtrack can't help but make you feel like you are front row at your favorite concert venue. In addition to incredible musicality, the Kendall also excels in home theater applications, adding true directional bass to your soundstage. The speaker features woven Kevlar drivers with powder-coated die-cast aluminum baskets, braided tinsel leads, custom-designed crossovers, an anodized aluminum tweeter with linear response faceplate, and much more. These features are dressed in genuine wood veneers and come in two finishes, allowing the Kendall to harmonize in any home. The astonishing beauty and sophistication of our flagship electrodynamic 3-way bass-reflex loudspeakers are one of a kind. The Kendall's are KLH's longest prized possession and guarantee to reconnect listeners with their music.

Hans Wetzel represented the Kendall best himself in his SoundStage review:

"The resuscitated KLH has clearly invested a lot of money and talent into ensuring that their new flagship tower speaker sounds as if it belongs in a conversation about such established audio names as Elac, KEF, and Monitor Audio. Then there are its good looks, great build quality, and nearly full-range frequency response. Add to all of that an industry-leading ten-year warranty, and it's easy to see that this KLH tower offers tremendous value. The Kendall is part of an auspicious first effort by the reinvigorated KLH, and I suspect it will be a rousing success with both the audiophile and home-theater crowds. As I typed the final words of this review, Roon began playing Mase's "Welcome Back" through the KLH Kendalls. Couldn't have said it better."
